

CASA Traveling Tutor Program 2019

CASA SHaW has been the fortunate recipient of continued support for its in-home Traveling Tutor initiative, which has served ten children so far in 2019. With additional support from Roche, all of these children received a laptop to support their academic engagement. The results continue to be positive; all of the students were promoted to the next grade level this past school year, and all of them continue to make progress in strengthening their academic and interpersonal engagement skills. Trauma can impair kids' ability to learn without intervention, we are grateful to the Children's Hope Initiative for their ongoing support of this important, life changing initiative that addresses these barriers to success.
